THIS IS UNEVALUATED INFORMATION

25X1

1. The Budapest/Kelenfoeld-Székesfehérvár railroad line was being double-tracked in 1951. In June, the second track was completed between Székesfehérvár and Martonvásár, 33 km southwest of Budapest. Between Martonvásár and Erdliget, 18 km southwest of Budapest, the railroad embankment was completed and ties and rails were being laid. The railroad embankment between Erdliget and Nagytetény on the southwestern perimeter of Budapest was being constructed. Work had not yet been started between Nagytetény and Kelenfoeld. \*

2. [redacted] the double-tracking of the Budapest/Kelenfoeld-Székesfehérvár railroad line was scheduled to be completed by late 1951. After the completion of the power station at Inota, 20 km west of Székesfehérvár, this line will be electrified. \*\*

25X1

3. In the fall of 1950, [redacted] a connecting link between the Kelenfoeld-Pusztaszabolcs and the Kelenfoeld-Székesfehérvár railroad lines was being built. The railroad link will eliminate using the Kelenfoeld railroad station for operations to and from Székesfehérvár. [redacted]

25X1

- \* [redacted] Comment. For route of the Budapest/Kelenfoeld-Székesfehérvár railroad line, see Annex. The Székesfehérvár-Kapolnasnyek section was already double-tracked. The laying of the second track on the Kapolnasnyek-Budapest/Kelenfoeld section has been under way for some time and has been mentioned in the Hungarian press. The reported project will establish another major railroad line from Budapest to the southwest.

25X1

- \*\* [redacted] Comment. Inota is on the single-track Székesfehérvár-Veszprém main railroad line. The proposed electrification of this railroad line, although reported for the first time, is credible.

25X1

- \*\*\* [redacted] Comment. For location of this connecting link, see Annex. This link is believed to be of only local importance.
